

ASTROWars heat up with the launch of third-party tokens

April 29, 2022 + Astro News

The contenders have thrown down their gauntlets. At least five protocols are already building staking solutions for the soon-to-launch vxASTRO points tokens: Apollo DAO, Reactor, Retrograde, Spectrum Protocol and Orion.

Their voices will help democratize access to governance over Astroport and determine how to allocate ASTRO emissions to liquidity providers (LPs).

Several protocols have announced lockdrop dates as they position themselves to deploy their ASTRO staking solutions. At a very high level, their approaches are similar: entice ASTRO holders to deposit their tokens on their platforms in exchange for their own governance tokens and Astroport-related derivatives (such as xASTRO and vxASTRO).

Protocol	Event	Date	Notes
Apollo DAO	Lockdrop	May 2, 2022- May 6, 2022	Deposit vxASTRO for 3-12 months in exchange for vesting APOLLO tokens. When the lock period ends, users will receive vxASTRO, which can be traded for vxASTRO or used for continued rewards.
Orion	ASTROBooster	April 29, 2022	Convert your ASTRO or vxASTRO tokens into a derivative vxASTRO token at a rate 1 vxASTRO per 1 vxASTRO.
Orion	xASTRO-orionASTRO Liquidity Pool	TBD	Participate in the xASTRO-orionASTRO liquidity pool.
Reactor	RCT-UST Bootstrapping Pool	April 28, 2022- April 30, 2022	2,500,000 million RCT (2.5% of supply) will be deposited into the LBP at a starting weight of 80% RCT and 20% UST. This weighting will end at 50% RCT and 50% UST. Deposit UST during the LBP in exchange for RCT. Please 1 UST will become part of Reactor's strategic fund, mostly used to increase engine software for SASTRO and SANC and other associated projects.
Reactor	Convertdrop	May 1, 2022- May 5, 2022	ASTRO, vxASTRO, and ANC holders can convert their tokens into vxASTRO and vxANC and stake them for 3-12 months, when the lock expires, users will be able to receive their ASTRO, vxASTRO, and vxANC in the form of vxASTRO, vxANC, which can immediately be exchanged for vxASTRO, vxANC.
Retrograde	RETRO-UST Bootstrapping Pool	May 1, 2022- May 4, 2022	10,000,000 RETRO tokens (1% of supply) is deposited into the RETRO-UST bootstrapping pool. Participants will receive RETRO after two months.
Retrograde	Boosted conversion event	May 4, 2022- May 11, 2022	Deposit ASTRO or vxASTRO and receive RETRO + vxASTRO + LP tokens after three months.
