Launching the Astroport brand into the creative commons

November 25, 2021 • Astro News

◆◆◆ incoming transmission ◆◆◆

Astroport hovers among the stars, an intergalactic trading port that belongs to the only people who matter... its users and builders.

In the spirit of this radical decentralization, all aspects of Astroport must belong to the community... from the smart contract code to Astroport's logo and brand itself.

Today, we're excited to announce our branding policy, which is intended to empower you, the community, to get creative with Astroport. Take the Astroport logo and put it on t-shirts, hats, and tungsten cubes. Or make it look even cooler — it's all up to you.

Starting now, all assets will be available under a Creative Commons Attribution-ShareAlike 4.0 International License. Check out all the details below, or dive into our graphics files [here](#). Let's build the galaxy's best DEX together.

Astroport Brand Policy

The Astroport name, marks, dress, logos and brand, including the name "Astroport", were created by a joint venture among Delphi Labs, Terraform Labs, We3 and Attic Labs (the "**Joint Venture**"). A complete set of such intellectual property created by the Joint Venture is available at the [Astroport Design Kit here](#)(collectively, the "**Astroport Designs**").

The Astroport Designs are **not** trademarks or service marks and are not intended to identify the source of any goods or services. They constitute part of the ownerless, decentralized Astroport commons, which is governed through a combination of rough social consensus and the on-chain governance processes of the Astral Assembly.

Accordingly, to whatever extent the Joint Venture possesses intellectual property rights in the Astroport Designs, the Joint Venture hereby licenses all such rights to the public under the [Creative Commons Attribution-ShareAlike 4.0 International License](#) (the "**License**") Among other things, the License entails that you may, subject to the conditions set forth in the License:

- reproduce and "Share" (as defined in the License) the Astroport Designs, in whole or in part; and
- produce, reproduce and Share any Adapted Material (as defined in the License, which includes material that is derived from or based on the Astroport Designs).

The License conditions include:

- attributing the Astroport Designs and any Adapted Material to the Joint Venture and the creators of the Adapted Material; and
- adding the Creative Commons Attribution-ShareAlike 4.0 International License to any Adapted Material (which means that the Adapted Work will be licensed to the public on the same terms as the Astroport Designs).

The foregoing is only a partial summary of the License. In the event of any conflict or inconsistency between the summary and the License, the License shall govern, control and prevail.

DISCLAIMER: *This article does not constitute investment advice. Before interacting with Astroport, review the project disclaimers [here](#).*
