# New UI inbound at Astroport.fi

December 8, 2022 + Astro News

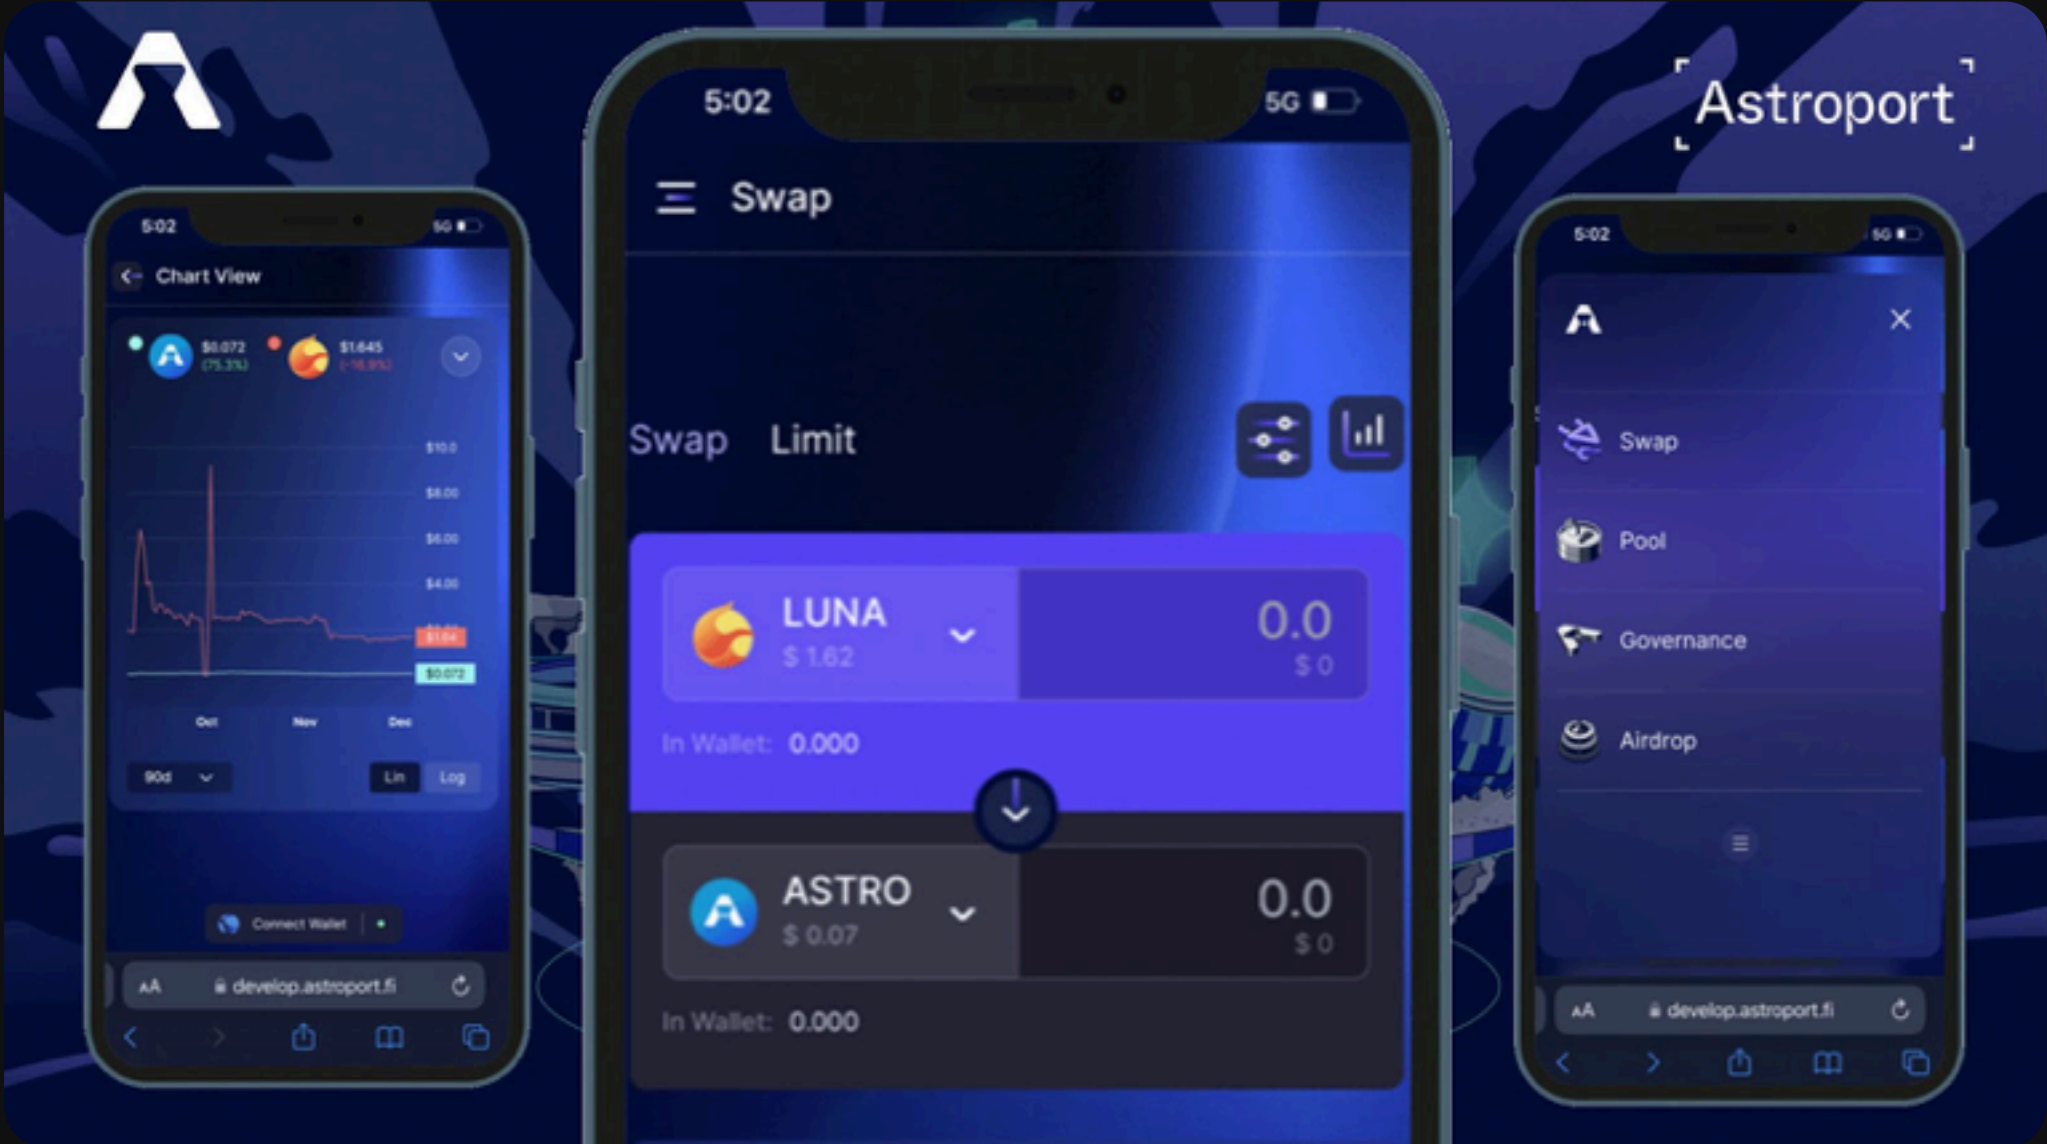

Deep within Astroport's core, a band of designers and coders are completely reimagining the user interface (UI) at Astroport.fi. Expected to deploy within ~7 earth days, the new UI will feature a cleaner design, revamped navigation tools and more advanced charts.

That means you'll soon be able to trade, provide liquidity and analyze your positions on Terra faster and more intuitively. It also means Astroport's UI will be more extensible, so it can more easily integrate new features and/or wallets.

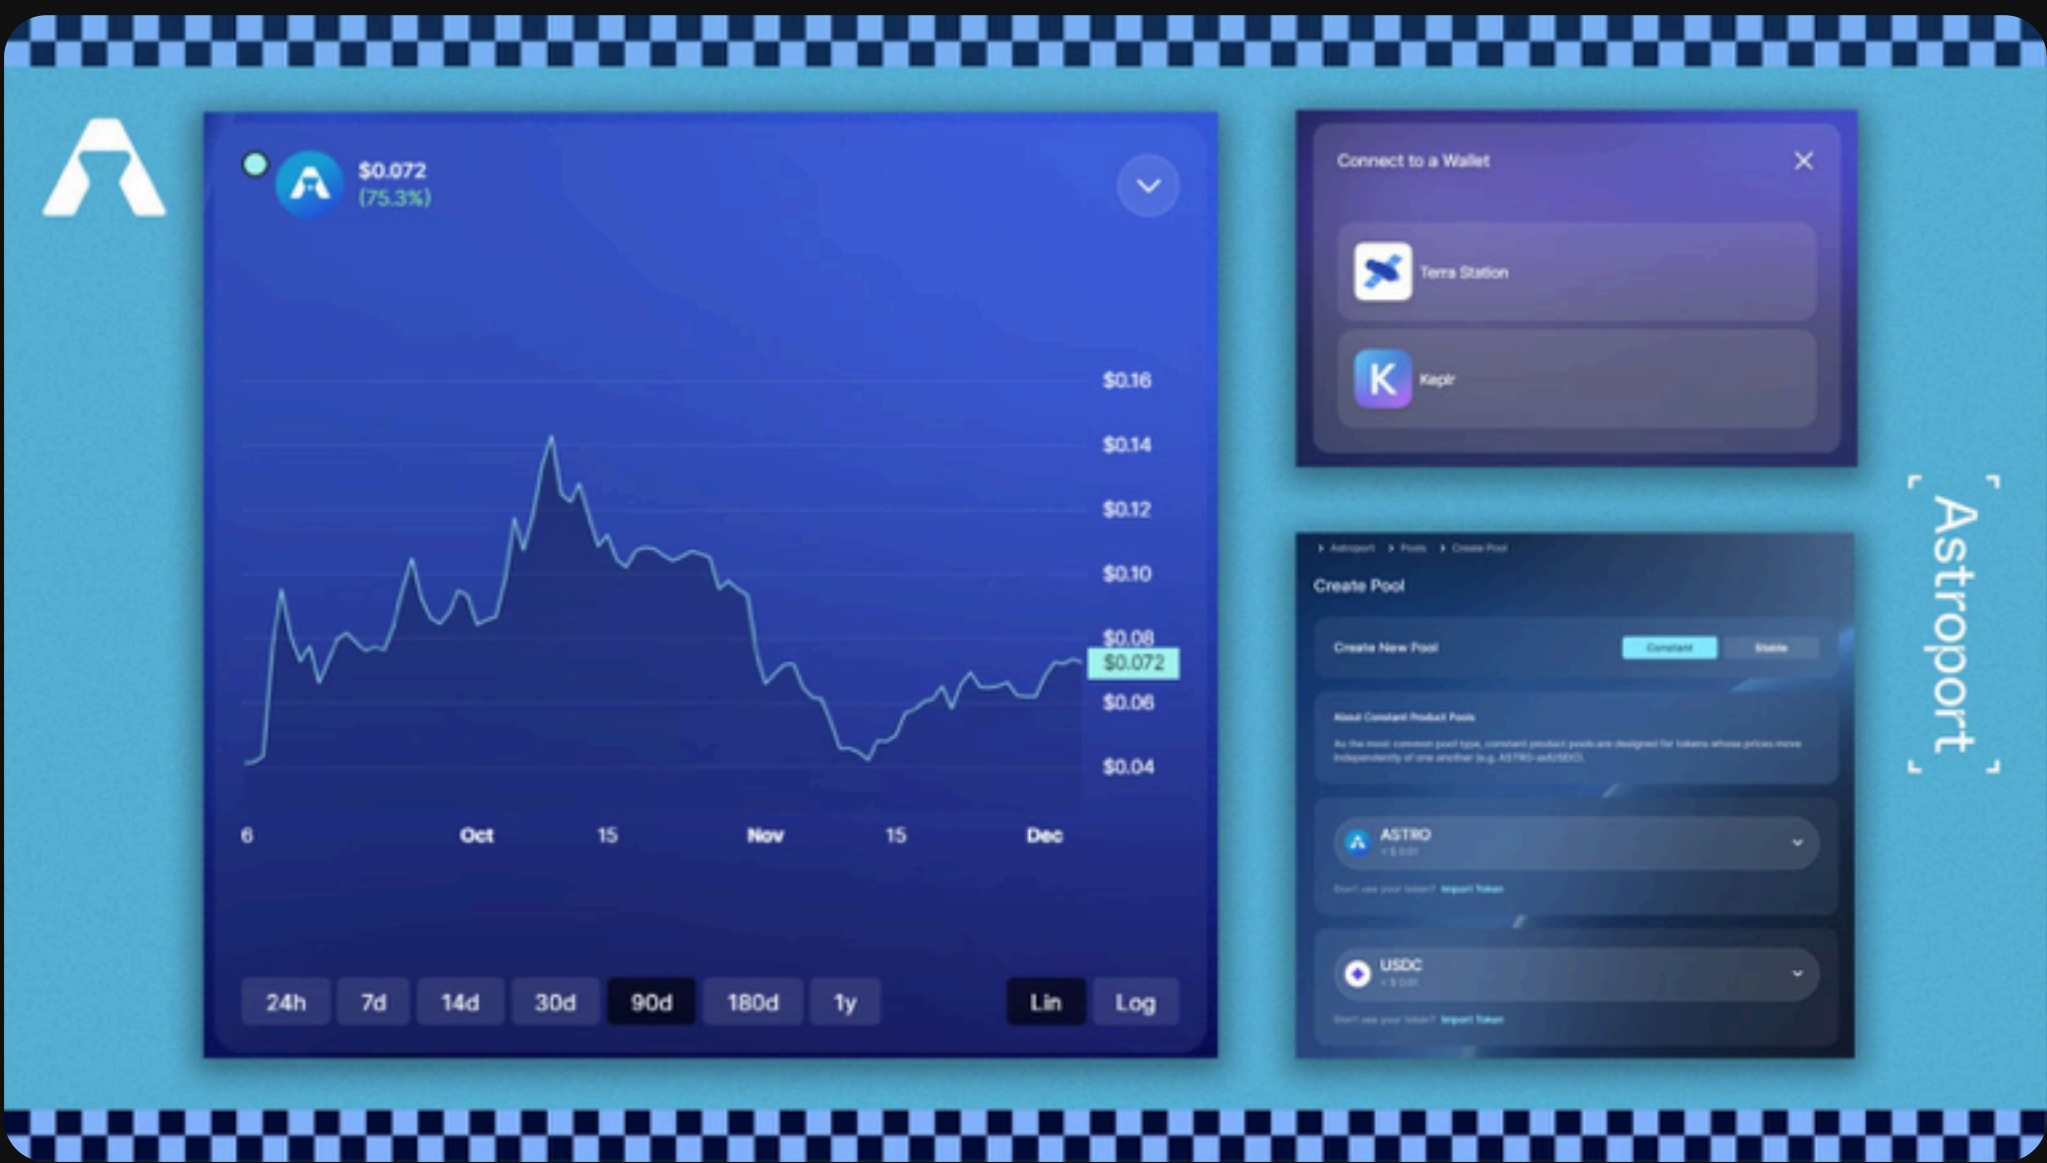

The freshly redesigned UI features new colors, navigation, and charts.

Satellites in the Magellanic steam intercepted numerous screenshots including the upcoming mobile interface.

The new UI is fully optimized for mobile swaps.

Advanced charts, pool pages and popups are designed to streamline interactions and data analysis.
